## Commodity Pairs

Currency Code	Currency Pair	Minimum Spread (pips)	Average Spread (pips)
XAUUSD	Gold in Dollar	0.3	1.2
XAUEUR	Gold in Euro	4.6	9.8
XAUAUD	Gold in Australian Dollar	0.8	3.1
XAUJPY	Gold in Japanese Yen	4	22
XAUGBP	Gold in British Pound	1.5	3
XAUCHF	Gold in Swiss Franc	0.5	1.9
XAGUSD	Silver in Dollar	0.3	0.8
XAGEUR	Silver in Euro	0.7	5
XAGAUD	Silver in Australian	1.0	4.3
XTIUSD	Dollar Crude Oil in Dollar	1.2	5
XBRUSD	Brent in Dollar	4.0	2.3
XNGUSD	Natural Gas in Dollar	4.0	1.6
XPTUSD	Platinum in Dollar	11.	4.8
XPDUSD	Palladium in Dollar	1	5
		15.	6.3

\*Overnight rates on XTI, XBR and XNG are high since the swaps for these crosses are based on the price difference between the (futures) front month costs. This is determined by the forward rate curve in that particular market.

As an example: The Jun/Jul Brent spread was -.75/- .74 with July trading over June. So that gives a 75c charge to roll the monthly contract and 75/c divided by 20 working days gives 3.7c to roll daily.

The forward curve is determined more by supply/demand for the energy contracts rather than purely interest rates, so if there was a backwardation market, i.e. where the near month was trading higher than the far month then they would be paying on the swap. Also if the current curve was flatter i.e. less of a difference between the near and far months, then the swap cost would be much lower.
